LAMILUX Continuous Rooflight B

Climbing Hall, Eisenach (Germany)

Short information

Place / Country:	Eisenach, Germany
Year:	2019
Object type:	Climbing hall
Solutions:	LAMILUX Continuous Rooflight B

The reconstruction of the Wartburg Brewery in Eisenach also involved a renovation of the roof. The Wartburg Brewery now has a climbing hall for children and adults to let off steam. The new climbing hall is flooded with plenty of daylight thanks to the installed LAMILUX Continuous Rooflights B. Due to the special roof shape (barrel roof) the assembly was very demanding. A great deal of consultation and detailed planning was also necessary in advance. A total of four LAMILUX Continuous Rooflights B with integrated ventilation flaps were installed on the roof. In addition, LAMILUX smoke and heat extraction devices were also integrated, which are activated in the event of fire.
