LAMILUX Rooflight F100W

Kärcher, Winnenden, Germany

Essential info

Place / country:	Winnenden, Germany
Year:	2023
Building type:	Production hall
Solutions	Rooflight F100W

The all-round LAMILUX service and the professional installation of Daylight Systems were the reasons why the planners decided in favour of 71 LAMILUX Rooflights F100 W for the renovation of the Kärcher production hall. The 100 x 250 cm, triple-layered Rooflights provide the workplaces below with optimum daylight, while the integrated SHEV ventilation promises safety in the event of fire and natural ventilation at all times. As the work was carried out during ongoing operations, access to the SHEV domes from below posed a challenge. The Fit 1 and Fit 6 Renovation Frames ensured a smooth process and simplified installation, allowing the add-on elements to be fitted precisely.
